GENERAL INDEX TO VOLUME LXXX

JANUARY–DECEMBER, 1936

January	Pages	1-54
February	"	55-118
March	"	119-174
April	"	175-236
May	"	237-292
June	"	293-352
July	"	353-408
August	"	409-464
September	"	465-524
October	"	525-582
November	"	583-640
December	"	641-702
Mid-December	"	703-756

A

ACCIDENTS AND ACCIDENT PREVENTION

Page

Air receiver explosions. C. O. Sandstrom *508
Dead space causes economizer explosion. W. E. Warner 391
Dry pipe explodes inside steam drum. A. C. Wiggins *335
Explosion doors outside. William Barnes 563
Fire hazards in elevator hoistways *204
Machine guards made from pipe and steel strapping. J. E. Hyler 681
N. Y. Edison tells what really happened at Hell Gate 97
Protecting valve stems. H. S. Coleman *509
Safe control of oil burners. J. O. G. Gibbons *595
Safe power-plant operating procedure. Eugene Caldwell
pt 1 boiler room 421
pt 2 engine room 492
Safety switch overloading prevented by interlock. R. B. Glen *389
63 years an engineer *29
Tags valve stems for safety. Mark Bell 336
To avoid liability for accidents. L. T. Parker 91
Why compressed-air explosions. R. McLaren 339
Why the dry pipe exploded. N. T. Pef. 509
Worker's responsibility in industrial safety. R. S. Moncrief 338

ACCOUNTING

Records of service consumption. (Poser applications) *672

AIR COMPRESSORS

Air-receiver explosions. C. O. Sandstrom *508
Common errors in compressed air systems. H. M. Spring (What's wrong with this picture?) 225, 227
Compressed air (Basic power services) .*650
Compressed-air explosions are preventable. G. B. Comfort 393
Cylinder-oil consumption varies with compressor speed. J. W. Jones 684
Excessive air pressure reverses receiver head. Charles Leighton *276
More things wrong with compressed air picture. J. J. Timmons 623
Safety valves for air compressors. C. A. Armstrong *277
Unloading systems for air compressors. C. O. Sandstrom *605
Why compressed air explosions. R. McLaren 339
Why compressed air explosions? C. O. Sandstrom *132

AIR CONDITIONING

A.S.H.V.E. meeting 152
A.S.R.E. meeting discusses air conditioning 730
Air conditioning simplified *177–196
Air conditioning simplified—correction .. 341
Controlled atmosphere (Basic power services) *651
Controls coordinate the air-conditioning system. R. B. Purdy *30
Houston, Tex., office building air conditioned *380
How to operate an air-conditioning system. R. B. Purdy *82
Namm store saves with diesel engines. Madeheim & Rosenthal *376
Noise troubles with fans 504
Oklahoma Public Service is air conditioning its Tulsa building 577
Power problems in air conditioning. (Mr. Carrier discusses at Babson Statistical meeting) 633
St. Louis Hotel Statler now air conditioned 519
Testing air conditioning. Carter, Richenbach, Martin 686
Unit air conditioners and coolers. R. B. Purdy *150
American Institute of Electrical Engineers —New York midwinter convention .. *98
American Society of Civil Engineers—Pittsburgh meeting 617
American Society of Heating & Ventilating Engineers—Chicago meeting 152

Page

American Society of Heating & Ventilating Engineers and American Society of Refrigerating Engineers—Semi-annual meeting in Poconos 453
American Society of Mechanical Engineers—Dallas, Tex., meeting *379
New officers of the society *731
Niagara Falls meeting *551
Oil & Gas Power Division meeting *454, *729
Program for meeting 696
Report of power sessions *719
American Society of Refrigerating Engineers—32nd annual meeting 730
American Society of Refrigerating Engineers and American Society of Heating & Ventilating Engineers—Semi-annual meeting in Poconos 453
American Society of Testing Materials—Atlantic City meeting 459
American Welding Society — Cleveland meeting 633
Association of Iron & Steel Electrical Engineers—Chicago Section meets ... 289

AWARDS

Hoover medal and Morehead medal to be presented to Swasey and Jacobus. *698
N.A.P.E. awards Grimshaw medals 459
Westinghouse honored, Swasey gets medal and Diesel lionized at A.S.M.E. meeting 732

B

BARS

Weight of copper, brass & steel wire, rods & bars (Power's Data Sheets) . 334

BEARINGS

Ball-bearing roller guides reduce elevator power *423

BELTS

Belt speed in f.p.m. for given pulley diameter and r.p.m. (Power's Data Sheets) 96
Correction of belt capacity. D. C. Miller 566
Flat belts. F. A. Annett *68
Multiple-V-belt starts synchronous condenser. M. Nasby *220
Multiple V-belts. F. A. Annett *71
V-belts kept in service by application of idler. C. L. Alexander *390
When belt is overloaded—what then? .. 361

BOILERS

Air leak in rear arch. K. D. Alexander 570
Are safety valves actually safe? P. W. Swain 416
Avoid waste in steam reducing. S. H. Coleman 83
Banana-shaped boiler described *153
Benson boilers on steamships 287
Boiler-room procedure for safe operation. C. W. Carter, Jr. 623
Boiler scale. H. M. Spring *436
Boiler tubes leak. Hamilton, Edwards, Webber, Carter, Cater 395
Bricklayer's glossary. Webster *81
Bridge wall at rear of grate. J. M. Myers 338
Bridge walls. L. M. Larson 338
Bridge-walls-curved versus flat. Bunyan Kennedy *100
Broken boiler brace. C. W. Carter 448
Broken boiler brace. Carter, Edwards, Ellis, O'Regan, Formby, Hyler 340
Broken boiler stays welded. H. M. Spring 449
Bulges in internally fired boilers. C. A. Armstrong 221
Bulging in a boiler caused by garage oil. C. O. Dibble *620
Bulging in water-tube boilers. R. O. Billings 364
Burners for pulverized coal *482
Bypass for boiler feedwater control. Elton Serrett *391
Carnegie-Illinois Steel Co. installs new boiler *358
Cause of flarebacks on low loads. C. L. Alexander 222
Cedar Rapids adds high pressure "top." Drabelle & Proescheldt *203
Cedar Rapids treats blow-off, boiler water to save. W. L. Starkweather ... *80
Change in setting avoids smoke. J. D. Relyea *131
Cleaning up the ash alley betters plant efficiency. S. H. Coleman 205
Combination burning of coal, oil, gas, refuse *488
Common boiler errors. John Timmons 392
Common boiler errors. H. M. Spring (What's wrong with this picture?) .. 164
Common vertical tubular boiler errors. S. A. Bowen 392
Common vertical tubular boiler errors. H. M. Spring (What's wrong with this picture?) 281
Common water column errors. H. M. Spring (What's wrong with this picture?) *108

Page

Condensate receiver. H. M. Spring. (What's wrong with this picture?) ... 570
Container Corp. of America meets power requirements by adding "top." Blum & Feicht *410
Continuous blowdown with control. Joseph Gish *563
Cork ball indicates water level. E. J. Novak 159
Curved bridge walls have disadvantages. J. B. Blake 338
Curved versus flat bridge walls. H. R. Riley 276
Cushion chamber prevents oil-fire pulsations. J. O. G. Gibbons 685
Cutting in a boiler. Brock, Franklin 224; F. H. Browning 40, 161; Myers, Spring 103.
Dangers of welding leaky staybolts. C. O. Dibble *564
Development of steam generating units discussed at A.S.M.E. meeting 722
Dissolved oxygen and embrittlement. Schroeder & Ralston 145
Dry pipe explodes inside steam drum. A. C. Wiggins *335
Economizer installations. Raymond Septor 566
Economizer installations. H. M. Spring (What's wrong with this picture?) .. 452
Electric boiler cuts heating costs. J. P. Topolosky *79
Errors in "What's wrong picture." C. W. Carter, Jr. 276
J. R. Evans & Co. installs turbo-generator plant for power *609
Exhaust steam process systems. H. M. Spring (What's wrong with this picture?) 394
External corrosion damages boiler head sheet. S. H. Coleman 273
Feedwater control at Richmond. N. J. Walker *489
Flarebacks on low loads. Edwards, Robinson, West, Rainey, Canfield, Kerchner 163
Flat vs. curved bridge walls. Billings, Cater 222
Float-governed feedwater. Wagner, Miner, Richards, Edwards 107
Ford Motor of Canada "tops" at 900 lb. pressure *424
H.R.T. boilers. H. M. Spring 566
"Humming" in boilers. Drabelle, Sogard 222
"Humming" in boilers. F. W. Jones ... 103
Indicating water level. James McIntosh 449
Inside versus outside calking of boiler plates. J. R. Williams 682
Is saving high pressure drips economical? O. M. Roberts 220
La Mont boilers shown at Leipzig Fair. P. W. Swain *214
Leaky tube ends. H. M. Spring 622
Millers Ford Station buys a "top," so does West End ..... *262; correction 341
Mills for pulverizing coal *480
Miscellaneous equipment for pulverized coal *484
Mistakes in installing boilers. R. O. Billings 335
Mistake in water column. S. A. Bowan 277
Monson, Mass., State Hospital installs one plant to take the place of nineteen boilers. E. C. Brown *598
Mound St. station of Laclede Power & Light adds new "top" 402
Mud-drum nipples of water-tube boilers a source of trouble. A. C. Wiggins .. 506
Multiple-retort underfeed stokers *469
Oil burners—types and characteristics .. *486
Oil-fire pulsations prevented by cushion chamber. J. R. Williams *565
Oil in boilers. C. O. Dibble 335
Oil in boilers. Summers, Dawson, Hunt, Myers, Mattox, Hyler, McCarty, Cochran 279
Operating on reduced pressures. Brockner, Rader, Septor, Martin 624
Overfeed stokers — spreader and inclined grate *476
Overheated boiler caused by water column. J. R. Williams *337
Palmer House gas fires its summer boiler. J. B. Nealey *610
Panel board shows operating conditions. R. O. Billings *157
Pittsburgh Plate Glass Co., Chemical Division, installs 900-lb. top *584
Pointers on gas burners *485
Pulverized-coal systems *478
Radical boilers (Midwest Power Conference) 282
Rebuilt windbox wall improved boiler draft. Abe Rocklin 683
Restricted expansion causes tube leakage. R. O. Billings *445
Richmond Station of Philadelphia Electric has automatic combustion control. N. J. Walker *373
Richmond Station's feedwater system. N. J. Walker *541
Rochester Gas & Electric adds a "top" on a low pressure plant and cuts coal rate *197
Rock salt in the firebox? Reynolds. Newman 44

(*) Illustrated. (Ed.) Editorial

Safe power-plant operating procedure. Eugene Caldwell.
pt 1 boiler room 421
pt 2 engine room 492
Saving exhaust head condensate proved expensive. J. R. Williams.....*158
Scale removal with caustic treatment. J. R. Williams..... 389
Scotch-marine boiler circulation increased. T. J. Britt..... *39
Single effect evaporators. H. M. Spring (What's wrong with this picture?).. 512
Single retort underfeed stokers.....*472
Soot-blower operation on pulverized coal fired boilers. S. H. Coleman..... 157
Spraying aluminum on refractory walls of boiler furnace increases life of wall (A.S.M.E. meeting)..... 263
Stack vents boiler during inspection. E. D. Beiser.....*275
Steamotive boiler described at A.S.M.E. meeting *719
Stuck tube cleaner. Wagner, Meyers, Parry, Allen, Avant..... 162
Superposition of units discussed by A.S.M.E. *551
Suspended walls, arches and water walls *135
Tailor-made feed system for dependable water. W. H. Archer.....*612
Taylor Instrument Companies replace boilers and save.....*631
Test your own boilers. W. H. Wood
pt 7 28
pt 8 .....*208
Traveling-grate stokers *474
Treat feedwater to prevent carryover. S. E. Tray.....*365
Tube leakage caused by scale. R. F. Leach 394
Velox boiler. P. W. Swain (Rambles of an engineer).....*418
Velox boiler for Oslo, Norway (picture feature) 333
Vent explosion doors to outside. Mark Bell 509
Water cools walls along line of stoker. C. O. Dibble.....*505
Water in superheater hurts dry pipe. E. C. Grief..... 450
Why boiler pressures are cut. H. M. Spring pt. 1 *148; pt. 2..... 260
Why boiler tubes leak. J. J. Timmons 566
Why the dry pipe exploded. N. T. Pef 509
Wire-rope for operation of combustion control. J. O. G. Gibbons..... 103

BOOK REVIEWS

A.S.H.V.E. guide 165
American electrician's handbook. Terrell Croft 400
American standards for rotating electrical machinery 400
Boiler feedwater treatment. F. J. Mathews 444
Control of electric motors. P. B. Harwood 627
Corrosion resistance of metals and alloys. McKay & Worthington..... 571
Diesel-electric plants. E. J. Kates.... 571
Diesel engineering handbook. Ed. by L. H. Morrison..... 45
Diesel handbook. Julius Rosbloom..... 343
Diesel operating guide. Julius Rosbloom 286
Electrical engineers' handbook. Harold Pender and others..... 689
Electrical measurements in principle and practice. H. C. Turner..... 286
Elementary engineering thermodynamics. Young & Young 165
Elements of diesel engineering, with questions and answers. Orville Adams 286
Graphical solutions. C. O. Mackey.... 165
Handbook of chemistry & physics. C. D. Hodgman 105, 689
Handbook of engineering fundamentals. Ed. by O. W. Eshbach..... 627
High-speed diesel engines. A. W. Judge 286
History of science, technology and philosophy. A. Wolf..... 219
Kempe's engineer's yearbook. Ed. by L. Pendred 219
Legal and ethical phases of engineering. Harding & Canfield..... 286
Maintenance of high-speed diesel engines. A. W. Judge..... 444
Manual of photo-elasticity for engineers. L. N. G. Filon..... 444
Mathematics of modern engineering. Doherty & Keller..... 219
Mechanical catalog 689
Mercury arc rectifier practice. F. C. Orchard 343
National electrical code handbook. A. L. Abbott 627
Nel cinquantenario della Societa Edison 165
Oliver Evans. Bathe & Bathe..... 219
Platform for America. R. E. Flanders 343
Power plant chemistry. A. H. Gill..... 105
Procedure handbook of arc welding design and practice.....45, 689
Professional engineer. E. L. Brown.... 627
Reducing industrial power costs. D. M. Myers 45
Rich land, poor land. Stuart Chase.... 627
Standard practices 105
Steam plant operating. Woodruff & Lammers 105
Steel plates 45
Technical data of fuels. Ed. by H. M. Spiers 219
Theory of lubrication. M. D. Hersey... 571
Thermodynamics for engineers. J. A. Ewing 400

Why quit your own? G. N. Peek with S. Crowther 689
Workshop receipts 400
Wrought iron. Aston & Story..... 689
Canadian Electrical Assn.—Murray Bay, Quebec, Convention 383
Chief Engineers Assn. of Chicago..... 402

C

COAL

Capacity of conical piles for coal storage (Power's Data Sheets)..... 34
Coal fields in the U. S. (map)..... 466
Data on oil-sprayed coal (A.S.M.E. meeting) 383
How much coal in a conical pile? F. F. Hough.....*367
Rochester Gas & Electric adds a "top" on a low-pressure plant and cuts coal rate *197

COMBUSTION

Burners for pulverized coal.....*482
Combination burning of coal, oil, gas, refuse *488
Fuel and firing must dovetail.....*466
How to burn a billion dollars (Ed.).. 465
Mills for pulverizing coal.....*480
Miscellaneous equipment for pulverized coal *484
Multiple retort underfeed stokers.....*469
Overfeed stokers — spreader and inclined grate *476
Pulverized-coal systems.....*478
Richmond Station of Philadelphia Electric has automatic combustion control. N. J. Walker.....*373
Single-retort underfeed stokers.....*472
Traveling-grate stokers *474

CONCRETE

Deterioration and repair of concrete structures (C.E.A. convention)..... 383

CONDENSERS

Ammonia condenser trouble. B. E. Ramsey 395
Bronze-welded condenser tubes..... 205
Checks condenser leakage with voltmeter. F. E. Schubert *447
Chloramines clean condensers. M. S. Maurer 417
Desliming condensers with chloramine. I. B. Romans..... 40
Detroit Edison condenser tests presented at A.S.M.E. meeting..... 721
Hydrogen cooling of rotating electrical machines. R. M. Easley.....*362
Increasing condenser-tube life. William Welch, Jr.....*607
Pond cooling by surface evaporation. D. O. Lima.....*142
Pond cooling by surface evaporation. N. T. Pef.....*394
Schenley Management produces in summer months because of water cooling apparatus. J. W. McNulty.....*256
Spray pond at Industrial Cotton Mills. Rock Hill, S. C.....*213

CONTROL

Air conditioning simplified.....*177–196
Air-conditioning system coordinated by controls. R. B. Purdy..... *30
Control elements (Basic service elements) *666
Elements of steam-engine governing....*316
Elevators with electrical brains.....*126
Fan speed control. H. D. James.....*124
Feedwater control at Richmond. N. J. Walker *489
Governing the modern steam turbine...*305
Governing prime movers. S. L. Kerr..*329
Lincoln Building controls heating with robots *84
Methods for regulating the output of air compressors. C. O. Sandstrom..*605
New uses for back pressure regulators. N. D. Gove..... *20
Oil system protected by two-way cock. C. O. Dibble.....*681
Richmond Station of Philadelphia Electric has automatic combustion control. N. J. Walker.....*373
Richmond Station's feedwater system has automatic control. N. J. Walker.*541
Turbine supervisory instruments discussed at A.S.M.E. meeting..... 723

COOLING TOWERS

Schenley Management produces in summer months because of water cooling apparatus. J. W. McNulty.....*256

CORROSION

Connors Creek plant of Detroit Edison corrects deposits..... 360
Metal spraying to overcome corrosion (A.S.M.E. meeting) 263
Metals fight corrosion (A.S.M.E. meeting) 725
Rust in condensate lines. W. J. Ryan.. 567
Treat feedwater to prevent carryover. S. E. Tray.....*365
When should blades on steam turbines be renewed? W. H. Lloyd.....*368
Why boiler pressures are cut. H. M. Spring, pt 1 *148; pt 2..... 260

COSTS AND PERFORMANCE

A.S.M.E. meeting discusses operating costs *551

Page

American Butter Co. purchases power except for refrigeration. F. C. Hicks.*600
Black Diamond Coal mine generates its power and saves $10,000 a year. F. H. Tathwell 609
Boston State Hospital modernizes plant and secures 30% more steam with 4% more fuel. C. W. Kimball.....*238
Changing pump packing halves power costs. J. F. Wooley..... 445
Container Corp. of America adds "top" and saves. Blum & Feicht.....*410
Electric boiler cuts heating costs. J. P. Topolosky *79
Fort Collins, Col., an economical small municipal power plant. A. C. Kirkwood *526
Gas engine plants at Dallas, Tex. E. J. Tangerman *502
Harlan, Iowa, municipal plant makes diesels pay their way. B. B. Smith..*544
Laundry saves power bill with generator and steam engine. L. M. Larson.....*101
Log of the plant's doings to help secure new equipment. E. J. Tangerman...*129
Mechanical transmission equipment today. F. A. Annett..... *64
Monson, Mass., State Hospital installs one plant to take the place of nineteen boilers. E. C. Brown.....*598
Rockville Centre reports operating performance of diesels. J. W. Anderson *15
St. Croix Paper cut week end heating steam 75%. J. P. Topolosky..... *24
Sludge gas for gas-engine fuel.....*120
Taylor Instrument Companies replaces boilers and saves.....*631
University of Missouri determines unit costs in use at heating, power and pumping plant. R. H. Sogard.....*247

E

ELECTRICITY

A.I.E.E. holds midwinter convention in New York *98
Alternating current celebrates its 50th birthday *217
Belt transmits chock to electric motor. R. O. Francis..... 37
Boulder Dam purchases four additional transformers 553
Changes in electrical elements and generators 712
Circuit breakers with steel walls. E. K. Read *39
Coal-larry trouble corrected by adding resistance to control. F. E. Schubert.*564
Commutators kept in condition by device. J. L. Young.....*337
Conduit for wound-rotor motor wiring. J. K. Young..... 622
Constant fan speed but variable output. H. D. James.....*241
D.C. current obtained with electrolytic rectifier. C. R. Anderson.....*159
D.C. transformer 545
Electricity (Basic power services).....*648
Fan speed control. H. D. James.....*124
Faulty commutation corrected with paper shim. J. F. Wooley..... 220
Firm capacity ratings. M. S. Dean.... 397
Forward-curved fans in parallel. M. S. Kice, Jr. 448
Forward-curved fans in parallel. Hagen 252, 392; Stubinger, Kice..... 252
Fuse rating on switch box. Thomas Trail *390
Generators won't synchronize. Cater, Armstrong, Kraus, Rainey, Markland. 280
Heating costs cut in St. Croix Paper by electric boiler. J. P. Topolosky..... *79
How to clean motor windings. White, Emerson, Brodie, Young, Hughes, McNally, Haworth, Madigan..... 686
How to make exciter maintain voltage. Otto Scholl 278
Hydrogen cooling of rotating electrical machines. R. M. Easley.....*362
Instrument-transformer accuracy. J. B. Gibbs *533
Magnetic clutches *538
Mechanical transmission equipment today. F. A. Annett..... *64
Mercury switches operate high water alarms. R. B. Glenn.....*619
Motor and transmission costs. F. A. Annett 66
Motor-wire conduit. A. D. Donham.... 512
N. Y. Edison tells what really happened at Hell Gate..... 97
New electrical milestones established in 1935 7
150,000 amp. D.C. generator runs without commutator (picture feature).... 33
Panel board shows operating conditions. R. O. Billings.....*157
Safe Harbor converter has a spring mounting. A. M. Goodison.....*207
Safety switch overloading prevented by interlock. R. B. Glenn.....*389
Static ruins oilcloth. Williams, Jerry, Hyler 450
Switch sticks made safe by electric heaters. John Bolton.....*507
Switch troubles in a cold climate (C.E.A. convention) 383
Synchronous or induction motors? S. L. Henderson *430
Telemetering applications and operations. L. D. Carlyou..... *22
Tin foil detects high mica on commutator. W. E. Warner..... 506

(*) Illustrated. (Ed,) Editorial

Page

Transformer for Consolidated Gas & Electric 543
Turbine-generators balanced by pencil. F. E. Schubert.....*206
Warning signals for motor shut downs. John Bolton *619
Wiring diagram for manually controlled freight elevator. R. B. Glenn.....*275

ELEVATORS

Ball-bearing roller guides reduce elevator power *423
Brakes of elevator corrected. A. L. Jones 101
Fire hazards in elevator hoistways.....*204
Good inspections make elevators safe. J. M. Myers.....*561
Know your wire ropes by inspection. Clymer & Emerson..... *26
Radio City has elevators with electrical brains *126
When to renew hoist and elevator ropes. Harry Nelson 224
Wiring diagram for manually controlled freight elevator. R. B. Glenn.....*275

ENGINEERING

Education plus. R. L. Leach..... 339
Engineer vs. operator. Silas Dewees... 223
Engineer vs. operator. J. M. Myers.... 339
Exhaust lines. E. J. Tangerman..... 202
Federal licensing. Canter, Bell, Robinson 160
Installing a power plant in the Andes. N. L. Rea.....*123
No room for high hats. Mark Bell.... 339
Rambles of an engineer. P. W. Swain pt. 1 men and machines in Germany *244, pt. 2 Dresden, Prague, Vitkovice, Nuremburg, Vienna, Munich *370, pt. 3 mountain air and new ideas *418, pt. 4 Paris, Southampton, London, New York *494
Recollections of engineering highlights on trip through Europe. P. W. Swain.*270
63 years an engineer..... *29

ENGINEERS

Engineers. J. O. Gibbons..... 570
Federal licensing. R. L. Hamilton..... 567
Federal licensing. Towse, Browning, Koontz, Bell, McIntosh..... 41
Licensing engineers (ed)..... 353
Marine engineers not guilty in fire. W. P. Lambert 684
No quarrel with "operating engineers." D. B. Steinman..... 448

ENGINES—INTERNAL COMBUSTION

Changing diesel piston rings. Sterrett, Dingwall 341
Diesel engines discussed by Oil & Gas Power Division of A.S.M.E.....*454
Diesel engine used for 18 months in Singer Building. N. M. King.....*678
Diesel and gas developments of the year *710
Diesel, gas and steam engine crankshaft-straightening. H. R. Riley.....*510
Diesel insurance rates changed..... 287
Diesel and its fuel. H. R. Ricardo.... *92
Diesel notes. Boyd Candlish..... 449
Diesel sessions at A.S.M.E. meeting.... 381
Diesel steels (table)..... 604
Diesel units *321
Diesels advance in 1935—gas engines gain. E. J. Tangerman..... *8
Diesels at the Leipzig Fair. P. W. Swain *214
Diesels heat a French town as well as light it *93
Diesels in Britain..... 266
Diesels in the Motor Boat Show.....*109
Diesels—types, elements, engine applications *317
52 typical new gas engine plants (table) 327
Fuels for the gas engine and for the diesel *328
Gas engine plants at Dallas, Tex. E. J. Tangerman *502
Gas engines—horizontal, vertical.....*324
Gas-engine indicator cards and exhaust-gas analysis (Power's Data Sheets)..*388
Gas engines power sewage disposal from sludge gas *120
Governing prime movers. S. L. Kerr..*329
Harlan, Iowa, municipal plant makes diesels pay their way. B. B. Smith..*544
Lafayette, La. adds diesel to power plant. H. N. Anderson *201, correction 341
Lubricating oil system impurities. J. I. Clower *432
Namm store saves with diesel engines. Madeheim & Rosenthal.....*376
New York Ice Club installs a steam diesel plant *155a
Oil-well drilling with two diesels. W. C. Lane *146
190 typical new diesel plants (tables). E. J. Tangerman..... 322
Pawlikowski engine runs on anything..*258
Pittsburgh Plate Glass uses Copper-Bessemer gas engine for standby power *259
Plants of the month—mainly internal combustion units *559
Portable diesels reduce cost of power for circus (Picture feature)..... 441
Replacing piston rings. Elliott, Myers, Cater, Dingwall, White..... 106
Rising diesel exhaust temperature. R. T. B. 40
Rockville Centre reports operating performance of diesels. J. W. Anderson *15
Rotary diesel-electric oil-drilling rig in Kansas *562

Page

Safeguarding diesel engine oil drainage. Elton Sterrett *619
Supercharging and costs feature diesel session of A.S.M.E.....*729
Trends of developments in municipal power plants. McDonnell & Kirkwood. 438
Wheeler Dam power house equipped with eight propeller-type turbines....*590
Which prime mover? Some pointers on selection *294
Will superheat hurt engines? Drabelle, Johnston, White, Myers, Pef, Duryee. 451

ENGINES—STEAM

Automatic drain prevents engine oil emulsifying. A. A. Fette.....*221
Crankshaft-straightening for diesel, gas and staem engines. H. R. Riley.....*510
Elements of steam engine governing...*316
Governing prime movers. S. L. Kerr..*329
High superheat may damage engine. E. C. Grief..... 570
Kinetic uniflow engine.....*208
Lubricating oil system impurities. J. I. Clower *432
Slide-valve engine cutoff governed. F. J. Vonachen 448
Steam-rate chart for a perfect steam engine 308
Steam engines—the types and their applications *311
Valves and gear, poppet, piston, cylindrical *314
Which prime mover? Some pointers on selection *294
Will superheat hurt engines? Drabelle, Johnston, White, Myers, Pef, Duryee.. 451
"Enthalpy" (ed) 14

EQUIPMENT—NEW

Air conditioner, portable..... 285
Air conditioner, small.....*456
Air conditioning condensing unit.....*456
Air conditioning unit..... 111
Air-drying system *515
Air eliminator 166
Analyzer, d.c. industrial.....*110
Auger, drain *629
Barograph *630
Basic process equipment (Basic power equipment) *657
Battery charger 46
Bearing, lock 398
Belt, composition 690
Belt drive *229
Belt lacing 691
Belt, light duty.....344
Belt, multi-V *111
Belt pulley bandage..... 399
Belt, safety 692
Belt for small pulleys..... 345
Belting, round leather..... 284
Block, terminal *230
Boiler feeder, direct pressure.....*515
Boiler, locomotive type.....*345
Boiler, water-tube *47
Bolt die heads.....*47
Bolt, expansion *573
Brake lining 47
Brake, motor-mounted 694
Brazing alloy 516, 695
Bucket, clamshell *284
Bus support *345, *630
Cable accessories *345
Cable terminal *694
Capacitor, power factor..... 691
Chemical, soot and slag destroyer..... 399
Circuit breaker *456
Circuit breaker, air.....*695
Circuit breaker, indoor, oil...573, *694, *695
Circuit breaker, oil.....*630, *693
Circuit breaker, oil recloser..... 572
Circuit breakers for auxiliaries.....*285
Circuit breaker, indoor oil.....*230
Clamp, fuse clip.....*630
Cleaner, industrial *514
Cleaner, waste-line *398
Cleaning, unit, vapor spray.....*344
Coating, protective 574
Coil-winding head, concentric.....*691
Combustion safeguard *285
Commutator and slip ring grinder support 344
Compensator, pressure *456
Compound, joint 230
Compound, pipe-threading 572
Compressor, air *284, *456, *576
Compressor, air cooled 692
Compressor, horizontal *691
Compressor, steam driven.....*691
Compressor, two stage rotary air.....*168
Condenser, air-line 692
Condensing unit *111, *516
Conduit, transite 398
Connectors, solderless *47
Contactor, magnetic *46
Control heating system..... *46
Control, make up water..... 166
Control remote valve.....*228
Control, temperature *111, *168
Control unit *690
Controller *573
Controller, current input.....*111
Controller, indicating *399
Controller, motor operated valve.....*168
Controller, pneumatic *457
Controller, recording *398, *400
Cooler, unit *516
Cooling tower, induced draft.....*573
Coupling, chain type.....*516
Coupling, flexible *399, *515
Coupler, V-belt *629
Crusher, coal *457
Cubicles of steel for circuit breakers...*399
Curve for draftsmen..... 691
Cutter, gasket *630
Detector, mercury vapor.....*166

Valve, pilot operated.....*692
Valve, plug *515
Valve-position indicator *629
Valve seat *111
Valve, solenoid and water pressure regulator *690
Valve, temperature control..... 457
Valves, wedge-gate *628
Valves for copper piping.....*457
Valves, with adjustable fulcrum.....*344
Vise set *47
Vise, steamfitter's *573
Vulcanizer *456
Water-level control, boiler.....*692
Water-tender *516
Wattmeter, volt 629
Weighing machine with remote control.*399
Welder *167, *514, 694
Welder, A. C..... 698
Welder, arc 692
Welder, dual arc control.....*628
Welder, vertical 284
Welding attachment *344
Welding electrodes 572
Welding generator *399
Welding torch *400
Well-tube system, thermocouple.....*166
Wrench, adjustable 630
Exhaust lines. E. J. Tangerman....202, 257, 343, 357, 426, 493, 529, 688

F

FANS

Constant fan speed but variable output. H. D. James.....*241
Control of fan speed. H. D. James....*124
Drive fixes fan type. M. S. Kice, Jr., pt. 1 *18, pt. 2..... *88
Fan blade protection. J. B. Linker.... 159
Forward-curved fans in parallel? Hagen 252, 392; Stubinger, Kice..... 252
Parallel operation of forward-blade fans. R. K. Annis..... 393
Forward-curved fans in parallel. M. S. Kice, Jr. 448
Noise troubles with fans..... 504

FEEDWATER

Boiler scale. H. M. Spring.....*436
Cedar Rapids treats blow-off, boiler water to save. W. L. Starkweather.. *80
Connors Creek plant of Detroit Edison corrects deposits 360
Data on water testing..... 508
Dissolved oxygen and embrittlement. Schroeder & Ralston..... 145
Embrittlement research (A.S.M.E. meeting) 725
Feed pump troubles—how to avoid them. A. H. Richards.....*86
Feedwater data source. H. A. Gustin.. 623
Feedwater heating system (What's wrong with this picture?).....*687
Feedwater heating system. H. M. Spring (What's wrong with this picture?)... 688
Feedwater treatment 161
Feedwater treatment. Pef, Ryan..... 341
Float governed feedwater. Wagner, Miner, Richards, Edwards..... 107
Low temperature caused by improper heater connection. S. H. Coleman....*683
Richmond Station regulates feedwater by automatic control. N. J. Walker..*489
Richmond Station's feedwater system. N. J. Walker.....*541
Rust in condensate lines. W. J. Ryan. 567
Scaling of turbine blading. C. R. Soderberg *596
Sulphate-carbonate ratio in boiler water. H. L. Haworth..... 685
Sulphate in boiler water..... 623
Sulphate ration improved by using pond-water makeup. R. G. Rea..... 560
Tailor-made feed system for dependable water. W. H. Archer.....*612
Test condensate for oil content. N. J. Geest 622
Treat feedwater to prevent carryover. S. E. Tray.....*365
Tri-sodium treatment. W. J. Ryan..... 278
Floods and power.....*210
Flue gas—Special gas washing plant for Battersea Station. Leonard Pearce.. 222
Foreword—Happy New Year. F. R. Low. 1

FUEL

Basis for choice of fuel and firing.....*466
Combination burning of coal, oil, gas, refuse *488
Fuels for the gas engine and for the diesel *328
Palmer House gas fires its summer boiler. J. B. Nealey.....*610
Pawlikowski engine runs on anything..*258
Sludge gas for gas engine fuel.....*120

G

Gages—Pressure-gage testing set. K. W. Seiter *391
Gas—Natural gas explosions in the basements. V. A. Eberly..... 684
Gas burners—Pointers on gas burners....*485
Germany—Rambles of an engineer. P. W. Swain pt. 1 men and machines in Germany *244, pt. 2 Dresden, Prague, Vitkovice, Nuremberg, Vienna, Munich *370, pt. 3 mountain air and new ideas *418

H

HEATING AND VENTILATING

A.S.H.V.E. meeting 152
A.S.H.V.E. and A.S.R.E. meet in Poconos 453
Air conditioning simplified.....*177–196
Controls coordinate the air-conditioning system. R. B. Purdy..... *30
Diesels heat a French town as well as light it *93
District steam plants could make by-product power *443
Electric boiler cuts heating costs. J. P. Topolosky *79
Heat transfer (Basic power operations).*653
Lincoln Building controls heating with robots *84
Namm store saves with diesel engines. Madeheim & Rosenthal.....*376
Progress in the generation of energy by heat engines (A.S.C.E. meeting)..... 617
St. Croix Paper cut weekend heating steam 75%. J. P. Topolosky..... *24
Steam flow through radiator orifices, lb. per hr. (Power's Data Sheets)..... 500
Submerged-combustion boiler *153

HIGH PRESSURES AND TEMPERATURES

High pressure, high temperature materials. J. R. Dawson..... 251
High pressure piping at U. S. Industrial Alcohol. J. A. Freiday..... *35
Is saving high pressure drips economical? O. M. Roberts..... 220
Pressures and speeds for the steam turbine *309
Horsepower on parade (ed)..... 293

I

INSPECTION AND MAINTENANCE

Adjustable keyway to take backlash from gears. H. Moore.....*336
Bearing trouble cured by equalizing air pressures. C. R. Anderson.....*337
Blocked governor to keep unit in service. E. R. Webber.....*683
Boilers restricted expansion causes tube leakage. R. O. Billings.....*445
Boiler scale removal with caustic treatment. J. R. Williams..... 389
Broken boiler brace. Carter, Edwards, Ellis, O'Regan, Forby, Hyler..... 340
Causes of flat spots on slip rings. L. L. Stoffel 38
Cleaning up the ash alley betters plant efficiency. S. H. Coleman..... 205
Cleans suction trap with compressed air. T. C. Brock.....*101
Commutators kept in condition by device. J. L. Young.....*337
Concreting with homemade skip. M. C. Cockshott *682
Core filler valve made from vertical check valve. F. W. Schneider.....*273
Crankshaft-straightening for diesel, gas and steam engines. H. R. Riley.....*510
Cylinder cover lifted by tapped holes. F. Muir *506
Desliming condensers with chloramine. I. B. Romans..... 40
Elevator's brakes corrected. A. L. Jones 101
Elevators made safe by good inspections. J. M. Myers.....*561
Engine foundation repair. J. D. Relyea.*274
External corrosion damages boiler head sheet. S. H. Coleman..... 273
Fan-blade protection. J. B. Linker.... 159
How to clean motor windings. White, Emerson, Brodie, Young, Hughes, McNally, Haworth, Madigan..... 686
How to operate an air conditioning system. R. B. Purdy..... *82
How wide a gasket? E. J. Novak 278, Bernard Kramer 392, Elton Sterrett.. 448
Ice used to lower electrical conduits. Brooklyn Edison Co..... 102
Keeping fuse labels clean. F. W. Schneider 275
Know your wire ropes by inspection. Clymer & Emerson..... *26
Leaking valve stopped by extension on stem. G. L. Alexander.....*507
Leaky tube ends in boiler. H. M. Spring 622
Light on oil can. E. J. Novak.....*158
Loose bearing on motor. W. E. Warner 505
Mud-drum nipples of water tube boilers a source of trouble. A. C. Wiggins.. 506
Oil in boilers. C. O. Dibble..... 335
Paint maintenance is mostly proper cleaning 685
Polishing the plant. Spring, Dingwall, Dawe, Myers 43
Pressure gage on flexible mounting. Elton Sterrett *563
Protects control cables with rubber hose. Thomas Trail.....*221
Pump repair made with chain and pipe. Elton Sterrett *273
Purifying lubrication oil. J. I. Clower..*593
Removing dust from air ducts. Simons, Hyler 624
Repair valves with redesigned stems. A. Honore *447
Safe power-plant operating procedure. Eugene Caldwell pt. 1 boiler room 421, pt. 2 engine room..... 492
Scaling of turbine blading. C. R. Soderberg *596
Shellacking avoids turbine oil leaks. G. Rosentreter 134
63 years an engineer..... *29
Split packing glands. E. E. Ervin...*505
Sprinkler-system pipes plugged with mud. D. K. Glenn..... *37
Staybolt pilot holes in correct alignment. R. O. Billings.....*621
Steel rule locates steam leakage. F. Doughtes 446
Stock room should have standardized supplies. Earl Pagett..... 565
Stops leakage from brass pipe thread. R. O. Billings..... 274
Stuck tube cleaner. Wagner, Meyers, Parry, Allen, Avant..... 162
Stud driver for simple type. F. Doughtes *278
Test your own boilers. W. H. Wood pt. 7 28, pt. 8.....*208
Tight and loose pulley in one piece. Frank Moore *389
Tinning dipper made from pipe fittings. J. E. Hyler.....*102
Tool for aligning shafts. B. L. Knight.*509
Tool for aligning two shafts. A. W. Blum 224
Tool for installing threaded studs. W. M. Halliday *100
Turbine casing found out of true. F. F. Axtell 505
Turbine governor fails..... 19
Turbines balanced by pencil. F. E. Schubert *206
Valve seat puller. Mark Bell.....*103
When to paint a vacuum tank. E. J. Novak 506
When to renew hoist and elevator ropes. Harry Nelson 224
Insurance—New diesel insurance rates announced 287

L

Labor—To avoid liability for accidents. L. T. Parker..... 91
Worker's responsibility in industrial safety. R. S. Moncrief..... 338
Low, Fred R.—life and appreciations.... *57
N.A.P.E. resolution in honor of F. R. Low *269

LUBRICATION

Automatic drain prevents engine oil emulsifying. A. A. Fette.....*221

(*) Illustrated. (Ed.) Editorial

Page

Oil costs cut 60% by separators. A. A. Fette *274
Purifying lubricating oil. J. I. Clower. *593
What makes good oil go bad? J. I. Clower *432

M

MANAGEMENT

As man to man (ed) 119
Lack of common sense is expensive. C. A. Armstrong 100
Log of the plant's doings to help secure new equipment. E. J. Tangerman.... *129
Money for improvements. J. O. G. Gibbons 104
"Weak link." Mark Bell 224

Oil—Service test of a turbine oil. Schneider & McConnell *530

OIL BURNERS

Manufacturers of firing equipment 468
Safe control of oil burners. J. O. G. Gibbons *595
Steamotive boiler unit oil fired described at A.S.M.E. meeting *719
Two-way cock for oil system. C. O. Dibble *681
Types and characteristics of oil burners *486
Oil drilling with rotary diesel-electric rig. *562

P

Patents—Should patent or capital come first? Myers, Hyler, Bell, Bernhard. 225
Whose patent? L. T. Parker *267

PIPING

Bulging in water-tube boilers. R. O. Billings 364
Bypass for boiler feedwater control. Elton Sterrett *391
Engine pipe failure. C. O. Sandstrom. *104
Exhaust steam process system mistakes. H. M. Spring 396
Flow of water through orifices (Power's Data Sheets) *680
Ford welds high temperature piping at River Rouge *497
Formula for flow velocity in a pipeline. F. Kwast 103
High pressure piping at U. S. Industrial Alcohol. J. A. Freiday *35
How big a pipe for your pump? F. A. Kristal *264
Length of pipe required to make an offset bend (Power's Data Sheets).... 156
Piping connections (Power applications) *669
Typical welding fittings (Power's Data Sheets) *218
Use of larger pipe will reduce costs of pumping. F. A. Kristal *414

"Power" (Magazine)

Historical summary 48
List of special sections published in Power 676

POWER

Bond of continents (Ed) 237
Exhaust lines—short paragraphs on power topics. E. J. Tangerman..... 257
Industry's growth is measured by the power it uses (chart) 513
Midwest Power Conference at Chicago.. 282
More machines mean more jobs, more wages (chart) 513
Power briefs of 1935 13
Speaking of power (Ed) 94
Power factor—Obtaining power factor with two meters. K. B. Humphery... 446

POWER PLANTS—STEAM

A.S.M.E. meets at Niagara Falls *551
American Butter Co. uses purchased power to make butter and feed. F. C. Hicks *600
Average plant—big job (Ed) 583
Battersea plant. P. W. Swain (Rambles of an engineer) *494
Black Diamond Coal mine generates its power and saves $10,000 a year. F. H. Tathwell 609
Boston State Hospital secures 30% more steam with 4% more fuel. C. W. Kimball *238
British central stations (picture feature) 554
Carnegie-Illinois Steel Co. installs new boiler *358
Cedar Rapids adds high pressure "top." Drabelle & Proescheldt *203
Clinton Cotton Mills plant—correction. E. B. Bossart 40
Connors Creek plant of Detroit Edison corrects deposits 360
Container Corp. of America superimposes high pressure equipment on plant and saves. Blum & Feicht.... *410
Electro-Motive diesel-electric locomotive works all-welded *289
J. R. Evans & Co. installs turbo-generator plant for power *609
Ford Motor of Canada "tops" at 900 lb. pressure *424
Ford Power House at River Rouge—an all welded piping job *497
Fort Collins, Col., an economical small municipal power plant. A. C. Kirkwood *526
Harlan, Iowa, municipal plant makes diesels pay their way. B. B. Smith. *544
Houston Lighting & Power deep-water steam and electric station operating experiences (A.S.M.E. meeting) 381
Lincoln Building controls heating with robots *84
Miller's Ford Station buys a "top," so does West End. *262; correction... 341
Monson, Mass., State Hospital installs one plant to heat many buildings. E. C. Brown *598
New York Ice Club installs a steam diesel plant *155a
Pittsburgh Plate Glass Co., Chemical Division, installs 900-lb. top *584
Plants placed in operation or under construction during 1936 (table) 706
Port Washington, Wis., plant operation discussed at A.S.M.E. meeting 721
Richmond Station of Philadelphia Electric has automatic combustion control. N. J. Walker *373
Richmond Station regulates feedwater by automatic control. N. J. Walker. *489
Richmond Station turbine steam-temperature distribution. N. E. Funk.. *434
Richmond Station's feedwater system. N. J. Walker *541
Rochester Gas & Electric adds a "top" on a low-pressure plant and cuts coal rate *197
St. Croix Paper cut week end heating steam 75%. J. P. Topolosky *24
Ship's power plants, see Marine.
Singer Building reports 18 months' operation with steam diesel plant. N. M. King *678
Steam plants placed in operation or under construction during 1935 (table) 4
Steam and power in 1935. R. B. Purdy. *2
Sucrest Corp. sugar refining plant requires low pressure steam *536
Taylor Instrument Companies replaces boilers and saves *631
Trends of developments in municipal power plants. McDonnell & Kirkwood 438
U. S. Industrial Alcohol uses high pressure piping. J. A. Freiday *35
University of Missouri determines unit costs in use at heating, power and pumping plant. R. H. Sogard *247
World Power Conference at Washington, D. C. *546

POWER SERVICES

American Butter Co. uses purchased power to make butter and feed. F. C. Hicks *600
